

# MEDICAL & INDUSTRIAL CART

## 4MC-01

### SECURITY

Minimal physical contact with the cylinders.  
Chain to hold the cylinders from slipping.

### STRENGTH

Long lasting tubular structure with 2 retractable wheels at the back to absorb the load

### MINIMAL MAINTENANCE

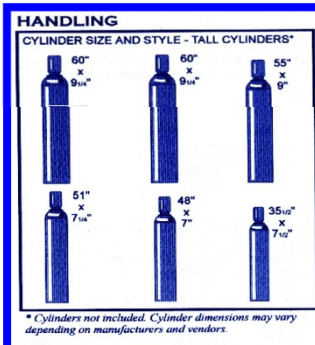

2 elasto-metric 10" Ø ball bearing wheels.

### EFFICIENCY

Load capacity of 1 cylinder 44/50 with great maneuverability.

### MODEL

4MC-01 standard cart

### DESCRIPTION

Carts for tall medical / industrial cylinders with retractable back trolley

### APPLICATIONS

Tall cylinders are heavy and carrying them may cause back injuries and/or accidents when moved. Equipped with back trolleys, the 4MC series carts are designed to safely carry one (1) or two (2) cylinders with minimal efforts as they are taking all the cylinder weight.

### FEATURES

Back trolley equipped with the sure-lock system - Two (2) large front ball bearing wheels - Two (2) swivel casters on the back trolley - Safety chain encased in a polymer tubing - Baked-on aluminized coating - Solid steel fabrication - Several models available - Carry cylinders of 35 inches tall and up and with a diameter of up to 10 inches.

### BENEFITS

Easily expandable/retractable back trolley - Back trolley safely locked when expanded - Very smooth and easy cart maneuvers - Minimize cylinder scratches - Carts keep aesthetic appearance - Heavy duty - Handle one (1) or two (2) cylinders at a time - Cylinder weight safely absorbed by the cart and not by the operator - Take minimal floor space when parked.

ORDERING INFORMATION	Part Number
Four-wheel cart for one (1) tall cylinder with retractable back trolley.	4MC-01
Four-wheel cart for two (2) tall cylinders with retractable back trolley - side-by-side loading	D4MC-02
Four-wheel cart for two (2) tall cylinders with retractable back trolley - front-back loading	4MC-02
