

DESCRIPTION

PART NUMBER: EB-16-3

Low profile multi-size horizontal transporter for 16" diameter cylinders.

APPLICATIONS

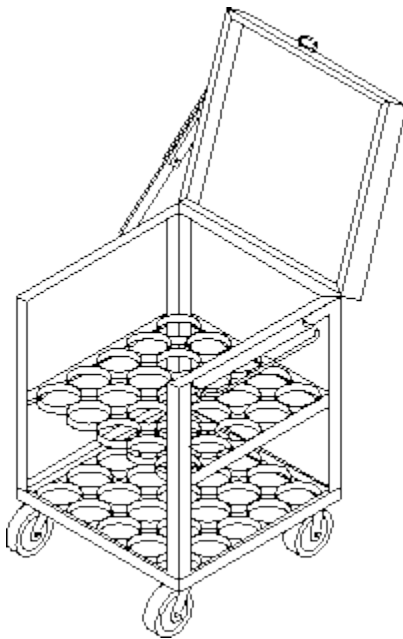

The **EB16-3** is ideally suited for hospitals requiring storage capacity for small medical cylinders. Condor transporters help to keep cylinders clean, organized and ready to go. The **EB16-3** is specifically designed to store and carry "Catalina" cylinders.

FEATURES

Heavy duty construction - Easy-to-slide-in cylinder slots - Chip-proof baked-on epoxy coating - Very compact footprint - Two spring-loaded door latches - Low profile design.

BENEFITS

Easy cylinder loading - Flexible storage configuration - Heavy duty construction for daily truck deliveries - Cylinders are kept inside the cage in case of vehicle accident - Cylinders keep clean appearance - Minimize cylinder scratches - Suitable for any type of small medical cylinders - Fits on pallet - Compact footprint.

Small medical cylinder vertical transporter.

APPLICATIONS

Mainly made for health care facilities, the **EB Series** transporters safely carry and store up to 36 small medical cylinders close to work areas while taking minimum floor space. During truck or floor transportation, the solid cover provides maximal valve protection against impacts. You can now select your transporter based on the quantity of cylinders, the size of the doors, the weight you are ready to carry or the floor space.

FEATURES

Heavy duty construction - Full steel cover - Two swivel front casters - Cover handle - Easy-to-slide-in cylinder slots - Lockable cover hinge - Chip-proof baked-on epoxy coating - Push bar.

BENEFITS

Easy cylinder loading - Flexible storage configuration - Made for daily truck deliveries - Compact footprint - Maximum cylinder valve protection - 360 degree turn within minimum floor space - Keeps esthetic appearance - Convenient truck handling.
